

Bio Energy Patches Clinical Guide

Bio Energy patches for stimulating the body's own natural wellness mechanisms.

Revised 10-2014

Introduction:

Bio Energy Patches work much like your cellphone. They work with frequency signals. Your cellphone "knows" your phone number and will ring when a call is received. You can't see the call come in because it is receiving an electromagnetic signal, vibrating at a specific frequency (your phone number). Your brain and body work in much the same way. It "knows" the frequencies to the various organs and systems in the body.

The Bio Energy Patch emits a specific frequency signal that opens up communication to the central nervous system as to which organ or system that is being affected or imbalanced. This communication is called "sympathetic resonance", and allows a "re-training" of the body/mind field, much like a mobile software app will re-program a computer. The Patches deliver specific energetic frequencies, which will allow the body to heal itself naturally.

Working with a Doctor or other Certified Health Practitioner is the best way to determine which Bio Energy Patches will be best suited for your wellness solutions!! Bio Energy Patches are programmed with only natural frequencies. Any reference to any kind of synthetic or prescription drug is to illustrate the "effect" that the patch is intended to mimic.

Every one of us has a unique energy system made up of different electromagnetic fields in a wide range of frequencies. This is called our bioenergy field. This field is made up of electromagnetic emissions, which are closely connected to our physical body as well as our external environment.

In other words, our bioenergy field has two sides—one reflecting the condition of our physical body and one reflecting the influence of our environment.

Therefore, our bioenergy field is like a mirror, showing us the changes occurring in our internal body as well as the external elements affecting it.

D-Tox: The patch gently assists the organs of elimination to get rid of harmful chemicals, wastes, and toxins that have accumulated over time and that have been stored in the fat tissues of the body. Toxic wastes can be introduced to the body through foods, air, and other environmental factors. Hence, the body will have a hard time to break down and eliminate the toxins by itself. The frequencies in this patch are designed after a supplement called, "Xenoplex" which is a suppository based on the "coffee enema" scenario. When you consider that most solvents and heavy duty toxins get stored in the fat tissues of the body, then you will understand why the liver needs extra help in this process, and when the liver is stimulated via the coffee enema effect, the liver will send out glutathione, a potent antioxidant to assist with its natural Detoxing action in a gentle yet effective way. Safe for children and adults.

Gluten sensitivity can lead to symptoms such as stomach cramps, diarrhea, and bloating. But unlike celiac, sensitivity doesn't damage the intestine. Gravity Balance™

Gravity Balance: Current science tells us that the magnetic field of the Earth has been greatly weakened in modern times, causing many different illnesses to manifest in the human body as a result. By attaching all five Gravity Balance chips, (per person) to the mattress, your body receives balanced frequencies of an enhanced magnetic field while you sleep, thereby encouraging better cell reproduction for increased healing and reconstruction.

The Gravity Balance energy chips maintain continuous support therapy for proper cell reproduction while sleeping. The human body depends on a strong inner magnetic core for healing. Proper placement of the chips on your bed mattress will support the body's energy core to increase individual cell's reproduction.

Note: This product is NOT a skin patch, rather it's a small one-inch energy chip that you place on your bed's mattress. Each package contains (5) chips, a six months' supply.

The EMR Power Quantum Energy Bracelet Protects Against: *Smart Meters, Cell Phones, non-ionizing radiation, Hand-Held portable Phones radiation, Personal Computers, Hostile Work Environments, Large Electrical Units, home or office, laptops; anything that emits harmful electromagnetic radiation. They are also used in other programming modalities such as weight loss, new hair and other foundational applications.*

(5 in 1) Earth's Natural Elements:

Negative Ions have an invigorating effect on the human body while positive ions have the opposite effect, quite often inducing a feeling of tiredness. Negative ions are created naturally by the energy associated with rolling surf, waterfalls and lightning. The levels of negative ions present in different environments highlight the deficiency of negative ions in our everyday domestic environment. The Bracelets are infused with negative ion powder emitting 1000 ions per cubic cm. All physical and mental activity is controlled by electromagnetic fields produced by electro-chemicals (ions) within the body.

- negative ion
- germanium powder
- neodymium magnet
- far infrared ray
- tourmaline

Germanium Powder is a trace element that is used as a dietary supplement. The germanium has been shown to stimulate the immune system, helping the body to fight disease. There's nothing like your own immune supporter to help you overcome disease. The EMR Power Quantum Energy Bracelets contain 99.99% Germanium.

Neodymium Magnet. Wearing a magnetic bracelet is a non-invasive way of applying beneficial magnetic fields to the body. We improved this technology by providing Unipolar Neodymium Magnets emitting 1000-1200 gauss, which is ideal and safe for continuous wearing. Magnetic technology is used in many performance bracelets favored by professional athletes.

Far Infrared (FIR) is the invisible band of energy from the sun's spectrum that we feel as warmth. Far Infrared technology absorbs energy from all wavelengths, and releases it into the Far Infrared wavelength. Far Infrared ceramic inserts absorb energy from various sources and releases it into the human body for gentle warming to help support circulation.

Tourmaline is a trace element that soothes panic attacks, especially those caused by dark or confined spaces, or in places where the atmosphere is frightening. It also helps control fears of doctors or dentists. Wear this crystal for protection against moaners, whiners, complaining neighbors or emotional vampires who burden you with their problems but do nothing to improve their situations.
